

V2 stage T — decomposed pipeline vs direct path, under equal adaptation (F1)

Pipeline cells: (a) exact memory + executor = 1.000 anchor · (b) = (c) = 0.762 · (cn) = 0.820

$\Delta(c - d) = -23.84$ pts $[-28.33; -19.60]$ → experience stop on short chains
